

Club Scrub, Pool Heat, New Equipment

PROJECT UPDATE

Club Scrub: Thank You for Your Patience

The vast majority of Club Scrub is behind us. We got a lot done: deep cleaning throughout the building, new flooring in the Stretch Area, updated lighting on the Blue Turf, plumbing repairs in the locker rooms, and painting in several spaces. A handful of smaller items will wrap up over the next few weeks, but the bulk of the work is complete. Thank you for bearing with us through the closures, and the occasional odor in the building. It was worth the wait!

HEADS UP

Pool Temperatures

We also want to give you a heads up on two pool issues we're working through. The Activity Pool boiler has had some ongoing issues and is now non-operational. We ordered a replacement early last month; however, it is still a few weeks out from delivery. In the meantime, we're doing what we can to keep the unit running, but the Activity Pool will be noticeably cooler than normal until the new one arrives.

Separately, we're dealing with a heater outage in the Warm Pool. That unit is much more widely available, and we were able to overnight one from Spokane. We're hoping to have it installed this weekend. Until then, the Warm Pool will also run colder than usual.

We'll keep you posted as repairs progress.

WHAT'S NEW

New Equipment

We're excited to share that we just added a Freemotion Coach Bike to the fitness floor! It's a different experience than a standard spin bike: a 22 inch HD touchscreen gives you access to thousands of on demand rides, including trainer led rides filmed in locations around the world and high energy studio style classes led by over 100 professional trainers and coaches. The bike adjusts easily to fit different riders, so it's worth trying out next time you're in.

And that's not all! Over the next several weeks, we're also expecting new treadmills from Precor to replace some older models (plus a few more to the total available) and additional selectorized strength equipment from Matrix. More to come as it arrives.
